

JAVASCRIPT MOCK TEST

<http://www.tutorialspoint.com>

Copyright © tutorialspoint.com

This section presents you various set of Mock Tests related to **Javascript Framework**. You can download these sample mock tests at your local machine and solve offline at your convenience. Every mock test is supplied with a mock test key to let you verify the final score and grade yourself.

JAVASCRIPT MOCK TEST IV

Q 1 - Which of the following function of String object causes a string to be displayed in a small font, as if it were in a <small> tag?

- A - link
- B - small
- C - sup
- D - sub

Q 2 - Which of the following function of String object causes a string to be displayed as struck-out text, as if it were in a <strike> tag?

- A - sup
- B - small
- C - strike
- D - sub

Q 3 - Which of the following function of String object causes a string to be displayed as a subscript, as if it were in a <sub> tag?

- A - sup
- B - small
- C - strike
- D - sub

Q 4 - Which of the following function of String object causes a string to be displayed as a superscript, as if it were in a <sup> tag?

- A - sup
- B - small
- C - strike
- D - sub

Q 5 - Which of the following function of Array object returns a new array comprised of this array joined with other arrays and/or values?

- A - concat
- B - pop
- C - push
- D - some

Q 6 - Which of the following function of Array object returns true if every element in this array satisfies the provided testing function?

- A - concat
- B - every
- C - push
- D - some

Q 7 - Which of the following function of Array object creates a new array with all of the elements of this array for which the provided filtering function returns true?

- A - concat
- B - every
- C - filter
- D - some

Q 8 - Which of the following function of Array object calls a function for each element in the array?

- A - concat
- B - every
- C - filter
- D - forEach

Q 9 - Which of the following function of Array object returns the first *least* index of an element within the array equal to the specified value, or -1 if none is found?

- A - indexOf
- B - join

C - lastIndexOf

D - map

Q 10 - Which of the following function of Array object joins all elements of an array into a string?

A - concat

B - join

C - pop

D - map

Q 11 - Which of the following function of Array object returns the last *greatest* index of an element within the array equal to the specified value, or -1 if none is found?

A - indexOf

B - join

C - lastIndexOf

D - map

Q 12 - Which of the following function of Array object creates a new array with the results of calling a provided function on every element in this array?

A - push

B - join

C - pop

D - map

Q 13 - Which of the following function of Array object removes the last element from an array and returns that element?

A - pop

B - push

C - join

D - map

Q 14 - Which of the following function of Array object adds one or more elements to the end of an array and returns the new length of the array?

A - pop

B - push

C - join

D - map

Q 15 - Which of the following function of Array object applies a function simultaneously against two values of the array *fromleft - to - right* as to reduce it to a single value?

- A - pop
- B - push
- C - reduce
- D - reduceRight

Q 16 - Which of the following function of Array object applies a function simultaneously against two values of the array *fromright - to - left* as to reduce it to a single value?

- A - pop
- B - push
- C - reduce
- D - reduceRight

Q 17 - Which of the following function of Array object reverses the order of the elements of an array?

- A - reverse
- B - push
- C - reduce
- D - reduceRight

Q 18 - Which of the following function of Array object removes the first element from an array and returns that element?

- A - reverse
- B - shift
- C - slice
- D - some

Q 19 - Which of the following function of Array object extracts a section of an array and returns a new array?

- A - reverse
- B - shift
- C - slice
- D - some

Q 20 - Which of the following function of Array object returns true if at least one element in this array satisfies the provided testing function?

- A - reverse
- B - shift
- C - slice
- D - some

Q 21 - Which of the following function of Array object represents the source code of an object?

- A - toSource
- B - splice
- C - toString
- D - unshift

Q 22 - Which of the following function of Array object sorts the elements of an array?

- A - toSource
- B - sort
- C - toString
- D - unshift

Q 23 - Which of the following function of Array object adds and/or removes elements from an array?

- A - toSource
- B - sort
- C - splice
- D - unshift

Q 24 - Which of the following function of Array object returns a string representing the array and its elements?

- A - toSource
- B - sort
- C - splice
- D - toString

Q 25 - Which of the following function of Array object adds one or more elements to the front of an array and returns the new length of the array?

- A - unshift

B - sort

C - splice

D - toString

ANSWER SHEET

Question Number	Answer Key
-----------------	------------

1	B
2	C
3	D
4	A
5	A
6	B
7	C
8	D
9	A
10	B
11	C
12	D
13	A
14	B
15	C
16	D
17	A
18	B
19	C
20	D
21	A
22	B
23	C
24	D
25	A
