SAP BODS MOCK TEST
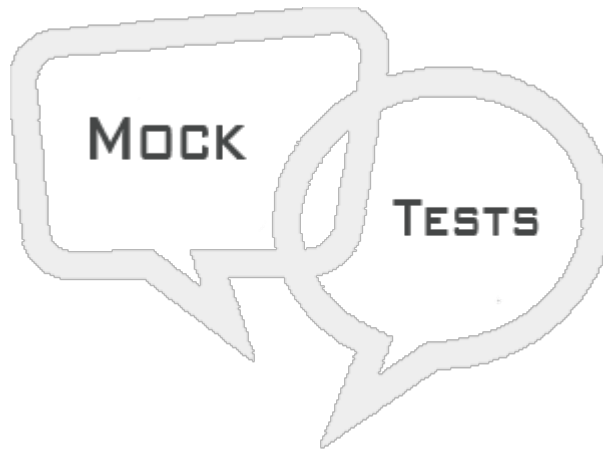

This section presents you various set of Mock Tests related to **SAP BODS**. You can download these sample mock tests at your local machine and solve offline at your convenience. Every mock test is supplied with a mock test key to let you verify the final score and grade yourself.

SAP BODS MOCK TEST III

Q 1 - In a Data flow to extract or load the data directly, which of the following method can be used for XML file?

A - Direct

B - Through Adapter

C - Both

D - None of these

Q 2 - Workflows can be created using the following methods −

Object Library

Tool Palette

A - True

B - False

Q 3 - What is the use of adding conditionals to workflow?

A - IF Then Else

B - IF Then

C - For Loop

D - All of the above

Q 4 - Which of the following is not a transformation type under data integration?

A - Data_Generator

B - Data_Transfer

C - Effective_Date

D - Hierarchy_flattening

E - Data Cleanse

Q 5 - Which of the following can be used to generate, map, and merge rows from two or more data sources?

A - Platform

B - Text Data Processing

C - None of these

Q 6 - Which of the following transformation can be used for Column mapping from input to output schemas, assigning primary keys, etc.

A - Data Integration

B - Data Quality

C - Query Transformation

D - Merge Transformation

Q 7 - Data Quality Transformations cannot be directly connected to the upstream transform, which contains nested tables. To connect these transform you should add a query transform or XML pipeline transform between transformation from nested table and data quality transform?

A - True

B - False

Q 8 - Which of the following transformation is used to analyze and process large volume of text data, searching entities, assigning them to appropriate type and presenting metadata in standard format?

A - Text Data Processing

B - Entity Extraction

C - Data Cleansing

D - Query transformation

Q 9 - Which of the following is a difference between TDP and data cleansing?

A - In TDP, Input is changed

B - In TDP, input size is more than 5KB

C - In TDP, input type is unstructured data

D - In TDP, create annotations in form of entities, types, etc.

Q 10 - A data flow data flow which is called from another data flow in the design is known as?

A - Single Data flow

B - Multiple data flow

C - Embedded data flow

D - None of the above

Q 11 - Which of the following is a type of embedded data flow?

A - One Input

B - One Output

C - No input or output

D - All of the above

Q 12 - Which of the following recovery mechanism allows you to rerun the jobs without previous partial rerun?

A - Automatic Recovery

B - Manual Recovery

C - Both

D - None

Q 13 - To enable recovery in Data Services, when a job fails which of the following option can be used to enable this option?

A - Execution Options

B - Trace

C - Global Variable

D - Substitution parameter

ANSWER SHEET

Question Number	Answer Key
1	A
2	A
3	A
4	E
5	A

6	C
7	A
8	B
9	A
10	C
11	D
12	B
13	A
